VASILIS MILESIS

SOFTWARE DEVELOPER

OBJECTIVE

To obtain an internship in software development, web development or cybersecurity, where I can contribute to building secure, innovative, and high-quality digital solutions while developing my technical and problem-solving skills in a collaborative environment.

EDUCATION

DEPARTMENT OF INFORMATICS AND TELECOMMUNICATIONS

National and Kapodistrian University of Athens
Grade : 9.4, Oct 2022 – Jun 2026

PROJECTS

REAL-TIME BIDDING PLATFORM

Full-stack web platform with real-time bidding, messaging, and rating features, including a machine learning-based recommendation system. Built with React, TypeScript, and Java.

ARCHIVER

File archiving tool that flattens directories, stores metadata, and reconstructs them safely. Implemented in pure C for optimal performance.

MUSIC GENRE CLASSIFIER

A music genre classifier leveraging convolutional neural networks in Python to categorize songs across multiple genres.
